SLAT 64

THERMAL INSULATED SLIDING SYSTEM

SLAT 64 thermal insulated sliding system provides economical and aesthetic solutions with its different frame options, and 2,3,4 railed design in large areas. It facilitates manufacturing with special corner connections. With the adjustable bearing and detail solution of the steel rail, a maximum of 150 kg leaf can be made.

Leaf height is maximum 98 inch . Multi-point locking can be done. Special case profiles offer economical solutions and comfort without using additional profiles for fly screens.
